AI Engineer | Agentic AI Systems & Multi-Agent Architectures

SUMMARY

AI engineer specializing in agentic systems and multi-agent architectures, focused on building intelligent agents that reason, plan, and interact with external tools and APIs. Experienced with LangChain, LangGraph, and RAG pipelines to automate complex workflows end to end. Skilled in deep learning, Docker-based deployment, and delivering real-world AI solutions across the full development lifecycle.

PROFESSIONAL EXPERIENCE

Project Development Specialist | Groupe Carré d'Or

October 2024 – Aug 2025

- Designed and maintained the official company website carredor.org, showcasing companies, brands, events, and enabling direct communication.
- Delivered responsive, user-friendly web solutions that improved client accessibility and brand visibility.
- Provided IT support and troubleshooting to ensure smooth technical operations.
- Collaborated with teams to implement innovative digital solutions aligned with business needs.
- Strengthened expertise in software engineering, project management, and full-stack web development.

AI Engineer & Project Consultant | Lead By Tech

Sep 2025 – present

- Architected and deployed an autonomous **CEO Agent** integrated directly into the Lyntrix ERP system, enabling users to query complex databases, detect profit leaks, and conduct market research via natural language.
- Engineered a real-time, low-latency voice orchestration pipeline integrating **Gemini Live** with local language models, allowing seamless, conversational querying of company data in the user's preferred dialect.
- Developed a deterministic **QA & Debugging Agent** utilizing Playwright to autonomously navigate, test, and debug web applications by simulating dynamic user scenarios across all system modules.
- Implemented multi-modal data ingestion pipelines allowing users to autonomously process sales and purchase orders into the database via text, voice, or image uploads, protected by a human-in-the-loop approval protocol.
- Designed and embedded a production-ready **AI customer support** assistant into the official Lead By Tech website to automate user support, inquiry routing, and workflow automation.

EDUCATION

Bachelor of Science in Computer Science | Lebanese International University (LIU)

August 2024

PROJECTS

Lyntrix ERP CEO Agent & Voice Orchestrator

June-July 2026

- Multimodal agentic system integrated with ERP data for autonomous financial diagnostics and database operations via real-time voice and image parsing.
- Tech:** Python, LangGraph, Gemini Live API, Multi-Modal Vision APIs, PostgreSQL, WebSocket.

Autonomous QA Testing & Seeding Agent

June 2026

- Event-driven AI testing agent that dynamically interacts with the DOM to automate end-to-end regression testing and bulk database seeding.
- **Tech:** Python, Playwright, Automated Browser Testing, LLM Tool Calling.

Domain-Specific Customer Support Assistant

Mars 2026

- Production-ready embedded AI chatbot grounded in verified company data to automate high-volume customer inquiries and workflow routing.
- **Tech:** Python, LangChain, RAG, Vector Databases.

SKILLS

AI & Orchestration: LangGraph, LangChain, CrewAI, Gemini Live API, Multimodal APIs (Vision/Audio), LlamaIndex, Ollama, Vector Databases (Pinecone).

Development & Testing: Python, FastAPI, Playwright, WebSockets, Node.js, ReactJS,Nextjs.

Infrastructure & Data: PostgreSQL, MySQL, Docker, Git, Linux, CI/CD pipelines, REST APIs, AWS.

Soft Skills: Technical Architecture Design, Complex Problem Solving, Strategic Planning, Cross-Functional Communication.

LANGUAGES

Arabic (Native), **English** (Full Professional Proficiency), **French** (conversional).
